Acel

10 - Site Equipment

Acel part number AC0165

55mm Channelling Chisel

Ideal for rapidly producing a 55mm channel in masonry for double conduit runs or capping.

Cranked off set design maximises ease of use.

Designed on an SDS Plus Drive System for machines with roto-stop facility.

Can be used in:

Soft brick
Medium density block
Lightweight block
Natural stone

Tech-Tips

Channelling Chisels can be sharpened when the cutting edges become blunt, ideally using a grinder or good quality file and replicating the original profile as much as possible.

SDS Plus shanks should be greased prior to and during use. This reduces heat build-up which reduces wear on the chisel and on the machine.

Technical Specification	
55mm Width	225mm Overall Length

10-AC0165-2021-V1
