

Technical Specification		
20mm Width	310mm Overall Length	

Acel part number AC0166

20mm Channelling Chisel

Ideal for rapidly producing a 20mm channel in masonry for running cables behind skirting boards or ceiling coving.

The extended shank and angle enables the user to reach behind even deep skirting and covings.

Cranked off set design maximises ease of use.

Designed on an SDS Plus Drive System for machines with roto-stop facility

Can be used in:

Soft brick
Medium density block
Lightweight block
Natural stone

Tech-Tips

Channelling Chisels can be sharpened when the cutting edges become blunt, ideally using a grinder or good quality file and replicating the original profile as much as possible.

SDS Plus shanks should be greased prior to and during use. This reduces heat build-up which reduces wear on the chisel and on the machine.

10-AC0166-2021-V1
