

AC14214

ROSS ceiling projector mount

- Highly adjustable projector mount for ceiling mounting of AV projection equipment. Designed for both domestic and commercial use, such as in meeting rooms, presentation areas or public spaces.
- The universal mounting frame has four mount arms which can be moved to suit all models of projector, up to a maximum arm width of 307mm.
- Fully adjustable for tilt and swivel after installation, giving the perfect alignment for your projector.
- Tilt adjustment up to $\pm 30^\circ$ in two directions: from side to side and up and down.
- 360° swivel adjustment allows the best possible alignment with the wall or projector screen. Ideal for locations where the wall is not directly square with the projector, or to change the direction the projector is facing.
- Fixed height 20cm from the ceiling.
