

AC6208

High rise wall kit - backdraught version - brown

The Internal Fit Wall Kit can be installed entirely from the inside of a property, reducing installation time and removing the need for costly and time consuming external grille fitting involving scaffolding.

This innovative new wall kit includes an adjustable wall liner and external grille with a rubber seal on the outside of the building.

The wall kit can be adjusted to wall thicknesses anywhere between 225mm and 390mm - just measure the wall, then use the guide on the tube of the wall kit to set it to the correct length.

Simply insert the tube into the hole, deploy the external grille and 3 pins will hold the wall kit securely in place. The external grille and seal can then be pulled back against the external wall so a tight fit can be achieved.

Technical Specification	
W (mm)	117
H (mm)	117
Duct Connection Location	Rear
Duct Type	Circular rigid
Shutters	Spring return
Spigot Dia (mm)	100
Warranty	2yr
Weight (kg)	0.448
