

AC6570

2kW Convector Heater With Thermostat

The stylish AC6570 convector heater has a powerful 2kW heat output making it ideal for heating medium to large sized rooms. It is very simple to operate thanks to the purposefully large easy to use rotary thermostat control dial to help maintain the desired temperature in your room. In addition, the thermostat also includes a setting to help protect against frost conditions.

The AC6570 is light in weight and can easily be moved from room to room thanks to dual integrated carry handles, whilst its 360-degree styling ensures it looks great from any direction (unlike many competitors single sided convectors). It has also been engineered to optimise rapid heat distribution and is near silent in operation making it ideal for use in a bedroom or where you need quiet yet effective heating.

The AC6570 comes with overheat protection and is BEAB approved (British Electrotechnical Approvals Board) and has been designed, engineered, and independently tested in Europe to the highest product safety standards to give peace of mind. Comes with 3-year guarantee (registration required).

This product is only suitable for well insulated spaces or occasional use.

Technical Specification

Attribute	Value
Height (mm)	443
Width (mm)	584(end of dial, 577 (not inc.dial))
Depth (mm)	233 (with feet)
Weight (kg)	3.6
Output (kW)	2
Heat Settings	1
Power Cord Length	1.5m
Tilt Switch	No
Carry Handles	Yes
Safety Cut Out	Yes
Frost Setting	Yes
Variable Thermostat	Yes
Approvals	CE, UKCA, BEAB
