

AC6575

2kW Oil Free Radiator With Timer

The AC6575 is the future of all radiators thanks to the combination of innovative heat technology and its super modern design aesthetic. It boasts superfast warm up times when compared to oil filled equivalents thanks to its Thermocore XR (Extra radiant heat) Oil-free technology. In addition, as there is no oil it is an eco-friendly alternative to oil filled radiators.

The AC6575 comes with an integrated electronic thermostat with 12-hour timer and offers the opportunity for either 12-hour runback or delayed start options. This AC6575 model features electronic climate control which has a highly accurate thermostat that can be adjusted in 1-degree Celsius increments and incorporates an easy to read and class leading large colour touch control LED display. The AC6575 comes pre-set with a clever intelligent eco heat mode which enables the radiator to work out the most efficient way of reaching the desired temperature set point. This feature is designed to save time and money by avoiding continuous adjustment of the thermostat or power levels often associated on more rudimentary radiators.

Portability is easier thanks to non-slip, non-scratch easy glide castors, dual integrated carry handles (conveniently at either end) and as it is oil free, lighter than oil filled direct equivalents. Other features include integral cable tidy and high gloss finish to enhance desirability further.

Technical Specification	
Attribute	Value
Output (kW)	2
Height (mm)	630
Width (mm)	590
Depth (mm)	285
Weight (kg)	8.4
Approvals	CE, UKCA, BEAB
Variable Thermostat	Y
Heat Settings	3, ECO, High, Low
Timer	12HR Run back and Delayed start
Frost Setting	Yes
Cable Tidy	Yes
Safety Cut Out	Yes
Power Cord Length (M)	1.8
Heating Technology	Thermacore XR
