

AC66197

90m Roll of Insulation Board Tape

Our thermal insulation board reinforcement tape is designed for use with our concrete faced insulation boards.

The use of this tape will prevent cable hot spots occurring if cables fall into the recesses between boards.

If a levelling compound is being used to encapsulate the heating system this tape will help seal the floor preventing any leaking of the levelling compound into surrounding areas.

Technical Specification	
Dimensions	50mm x 90m
Coverage	Suitable for 36m ² of insulation boards
Material	Self-adhesive fibreglass mesh

- Does not tear, shrink, stretch or bubble
- Requires no pasting or stapling
- High levels of adhesion
- Helps to seal area prior to using levelling compound
- Prevents cable hot spots caused by gaps in thermal boards
