

AC66217

50m Utility Grade Waterproof Duct Tape

This tape is a specially selected utility grade waterproof cloth tape coated with a pressure sensitive rubber adhesive for maximum adhesion.

It is used together with the 6mm Combymat insulation to create an even floating insulative layer beneath the foil heating elements of the Combymat system to prevent downward heat loss.

Technical Specification

Dimensions	50m x 40mm
Total Thickness	0.14mm
Material	Laminated Polyethylene/Cloth
Temperature Range	-10°C to +75°C
Manufactured In	China

- Good adhesion and strength
- Flexible and conformable
- Good adhesion within a temperature range of -10°C to +75°C
