

AC69404

2 Litre Expansion Vessel and Check Valve

- Expansion vessel and check valve
- For small unvented water heaters
- Of 5, 10, 15 litre capacity
- Comply with Water Regulations
- Required if there is a cold water draw off nearby or if expansion cannot be accommodated in the pipework
- Length of pipework needed for expansion 1.4 m for 5 litres, 2.8 m for 10 litres and 4.2 m for 15 litres
- Use this kit AC69404 where incoming water pressure is below 4.2 bar. If incoming water pressure is above 4.2 bar AC69405 is required which also contains a pressure reducing valve
- Expansion vessel must be installed vertically with the connections at the base
- Expansion vessel capacity 2 litres
- Expansion vessel set at 3.5 bar
- Expansion vessel connection 1/2" BSP male
- Check valve 15 mm compression
- Includes banding for wall mounting the vessel

Technical Specification	
Expansion Vessel	2 litre capacity
	Factory set at 3.5 bar
	Maximum charge 10 bar
	Connection 1/2" BSP male
Check Valve	Connection 15 mm compression
Approvals	All components WRAS approved
Warranty	1 year parts or replacement warranty
