

AC7392

Cutting Compound 450g

Features & Benefits

Extends tool life

Reduces wear and tap breakages

Solvent-free

Reduces production costs

Improves surface finish

Allows increased removal rates

Technical Specification

Contents	Blend of molybdenum disulphide, sulphur, phosphorus, petroleum wax and technical lanolin
Flash Point	250C
Temperature range	Drop Point 55C
Relative Density Worked	165
Penetration (IP179)	
Solubility	Insoluble in water
